**Chairman's Pen**

*My dear fellow exporters,*

*The Council carried out an employment survey of its small and medium scale companies and the data that we received from 29 companies, shows results of concern. These companies employed around 8000 personnel, both direct and indirect as on August 31, 2008. Our survey shows that by January 22, 2009 the total number of employment in these 29 companies fell to 6134 which was a drop of 23% during the same period. Projection made by these companies till the first quarter of next fiscal year indicates that total employment in these 29 companies are likely to drop by nearly 37% by the end of June 29, 2008.*

*The total export figures as intimated by the Government with respect to the month of December 2008 has shown the total export declined by 1% and the Union Commerce Secretary has stated that 15 lakh jobs are likely to be lost by the end of this fiscal year. Our survey results are in line with what the export trend that has been provided by the Government and the employment affects of the global slowdown.*

*I do hope that Government will provide some benefits to the engineering exporting community so that engineering companies can survive in the present scenario.*

*Yours sincerely,*

Ukraine gained its independence after the collapse of the Soviet Union in 1991. Promises of more market openness and economic reform after Ukraine's 2004 "Orange Revolution" have fallen short, and infighting between President Victor Yushchenko and Prime Minister Victor Yanukovich has generated instability. Prominent sectors of the economy include services, mining, metals, and manufacturing. The agricultural sector is strong but overregulated through quotas and tariffs on grain exports. Ukraine has benefited heavily from recent increases in the prices of metals. Despite lucrative opportunities for foreign direct investment, economic progress in the near term may be slowed by persistent corruption, steadily increasing gas prices, deteriorating infrastructure, and political uncertainty.

**Trade Policy**

Ukraine's weighted average tariff rate was 3.9 percent in 2002. Some export restrictions, service market access barriers, import taxes and fees, import licensing requirements, restrictive sanitary and phytosanitary regulations, complex standards and certification regulations, non-transparent government procurement, and weak enforcement of intellectual property rights add to the cost of trade. An additional 10 percentage points is deducted from Ukraine's trade freedom score to account for non-tariff barriers.

**Government Intervention**

Total government expenditures, including consumption and transfer payments, are high. In the most recent year, government spending equaled 43.6 percent of GDP. The government has privatized over 80 percent of its public enterprises, but the economy is still shackled by government intervention in the private sector.

**Foreign Investment**

The laws provide equal treatment with some restrictions in publishing, broadcasting, energy, and insurance. Foreign investment in weapons manufacturing and alcoholic spirits is prohibited. Complex regulations and corruption are major deterrents. Contracts are not always honored by the legal system. The current government is unwilling to continue its predecessor's re-examination of old, allegedly tainted privatization deals. Resident and non-resident foreign exchange accounts are subject to restrictions and government approval in some cases. Payments and transfers are subject to various requirements and quantitative limits. Some capital transactions are subject to controls and licenses.

### Import regulations and Customs Duties

#### Regulations

The only important barrier to trade and investment in Ukraine is the country's difficulty in transiting from a planned economy to a market economy. Following economic reforms, the country experienced a relative success concerning export and investment but all this requires perspectives and a long-term strategy. There are real structural barriers putting a break on trade and investment in Ukraine : corruption, lack of protection in terms of intellectual or industrial property, lack of foreign exchange, an ill defined or too bureaucratic hierarchy, an inefficient and little developed banking system, law, licenses and tariffs changes. Investment is precisely curbed by the absence of private property and a coherent privatisation programme, non convertibility of the country's currency and lack of financial liquidity, change of legislation relating to investment, lack of quality, lack of competitive prices for hiring or purchasing offices of representatives, poor infrastructures, political instability.

#### Customs Duties

The import duties to be paid by a foreign importer in Ukraine vary according to the type of product: alcohol, tobacco, motor cars, tyres, jewellery and other luxury products. The payment of these duties must be effected in the country's currency. Excise duties are also paid in the local currency and are calculated as follows: for non luxury products, a percentage is applied and for luxury products the excise duty is not calculated on the customs declared value but according to volume, number of units or weight of the import.

#### Visa Information

No visas are required for citizens of Armenia, Azerbaijan, Belarus, Georgia, Hungary, Kazakhstan, Kyrgyzstan, Mongolia, Poland, Romania, Russia, Uzbekistan.

Nationals of Andorra, Belgium, Canada, Cyprus, Czech, Denmark, Estonia, Finland, France, Germany, Greece, Holy See Hungary, Iceland, Ireland, Italy, Japan, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Monaco, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland, UK, USA may stay in Ukraine up to 90 days without a visa.

Everyone else will need a visa, an invitation or tourist voucher may be required.

#### Business Hours

Offices open at 9 a.m.

**Transportation**

**Road**

The road network is in poor condition. Drive carefully, avoid driving at night outside the cities, watch the behaviour of local people, who often do not respect the highway code and the general traffic rules. Also watch the pedestrians. Having an insurance for your vehicle is compulsory.

**Rail**

It is satisfactory on the whole, but journeys are slow (it takes one night to join the main cities in the province from Kiev). It is often difficult to get a return ticket in the station of departure.

**Air**

The domestic fleet is composed of old planes. For international flights, it is advised to travel with Occidental airline companies or on "Air Ukraine International" which jets meet the international safety standards.

**Transportation of goods**

**By Road**

The position of Ukraine is strategic: it is situated between Europe and Russia and constitutes a buoyant sector for the country. The road network of this country gathers 170,000 km of national highways and 2,60,000 km of local network. The road network represents nearly two thirds of the national transport system but goods transport by road tends to diminish.

**By Rail**

Concerning the railway network, half of the 227,000 km of railway lines are electrified. The means of air transport is not very safe. It is better to use trains (certainly slow and not comfortable) or hire a vehicle with a chauffeur.

**By Sea**

Maritime transport is carried on through nearly 30 ports. The river transport extends over 5,000 km of which the Dniestr river holds less than half the navigable surface.

**Doing Business in Ukraine**

**Local business incentives**

As for aids and incentives for setting up a business, companies can contact the different ministries related to the company's activity. A majority of the ministries is located in Kiev. Foreign investors may find many information on the website : [ukraine-gateway.org](http://ukraine-gateway.org).

**Legal Forms of Companies**

<i>Form</i>	<i>Number of partners/ shareholders</i>	<i>Minimum and/or maximum capital</i>	<i>Liability</i>	<i>Registration fee</i>	<i>Release of financial documents</i>
Private Limited Company	Minimum 3	Hryvnias 10,700. 30% must be released before the statutory shareholders meeting and the remainder within the registration year.	Partners' liability is limited to the amount contributed.	About Hryvnias 4,400.	Yes
Public Limited Company	Minimum 3	Hryvnias 21,300. 50% must be released before the statutory shareholders meeting and the remainder within the registration year.	Certain decisions must be taken with <sup>3</sup> / <sub>4</sub> majority and others with just the majority votes.	About Hryvnias 4,400.	No

### Registration and licensing procedures

A new business, with foreign participation, has to be registered with the administration of the district where it will be set up. Besides documents concerning the company setting up, for registration purposes, the foreign partner must provide a whole list of documents and notably a K-bis certificate, a Ukrainian bank's certificate guaranteeing that the company can honour its commitments. These documents must be authenticated by a French notary, legalized by the French Ministry of Foreign Affairs, the Consulate of Ukraine in France and translated into Ukrainian.

The legal registration delay is currently 5 working days after the sending in of the whole file. The foreign investment must be registered within the 3 working days of the contribution deposit.

### Foreign exchange control

The first anti-crisis measures have been, above all, focused on exchange control: suspension of pre-payments; obligation to use letters of credit for payments to non-residents; compulsory conversion of 50% of export receipts; suspension of foreign currencies interbank transactions; suspension of open positions for banks.

### Regulations concerning equity investment

The legislation provides the possibility to create a Ukrainian company with foreign investments in a Private Limited Company, in a joint-stock company, or in a 100% subsidiary form, and regulates their constitution and running. Partial take-over of an existing company, notably within an undergoing privatisation programme, is subject to the same legal procedures but requires approval from the State Assets Funds.

### Foreign Direct Investment inflows in Ukraine

<i>FDI inflows</i>	<i>2003</i>	<i>2004</i>	<i>2005</i>	<i>World rank (*) 2005</i>
FDI inflows (USD million)	1424	1 715	7 808	33/141

*(Source : UNCTAD - World Investment Report)*

*Note : (\*) World Rank = UNCTAD Inward FDI Performance Index. It is a measure of the extent to which a host country receives inward FDI relative to its economic size. It is calculated as a ratio of the country's share in global FDI inflows to its share in global GDP.*
