

**Council's Activities****EEPC INDIA Invites Participation at
Multi Product Trade Delegation to Tunisia, Egypt and Ghana
(22nd February - 2nd March, 2009)**

EEPC INDIA is pleased to organize with active support of the Indian Missions, a Multi Product Trade Delegation to Tunisia, Egypt and Ghana from 22nd February – 2nd March, 2009.

Tunisia : The sound macro-economic policies embarked on in the 80's by the Tunisian government is beginning to reap dividends as the Tunisia economy has received the highest ranking for African Countries in the World Economic Forums (Global Competitiveness Report 2005-06). Tunisia, which is the geographically the closest African country to Europe, has an agreement with the European Union, which has helped Tunisia modernise its economy. The growth of its GDP has been more than 5% in the recent years. The Exim Bank of India has extended Lines of Credit to Tunisian Banks for the benefit of Indian exporters. The major Indian engineering exports to Tunisia are Machinery, Instruments, Automobiles, Iron & Steel, Metal Products and Machine Tools.

Egypt : Egypt is the most populous country in the Arab world and has the second highest population of Africa. Egypt imports a wide variety of goods, especially capital goods such as machinery and equipment, necessary for its economic and infrastructure development. Today, the European Union, especially Germany, Italy, and France, supplies more than 40 per cent of Egypt's imports, while the United States accounts for 15-20 per cent of total imports.

Egypt has traditionally been one of India's most important trading partners in the African continent. The India-Egypt bilateral Trade Agreement has been in operation since March 1978 and is based on the MFN clause. India was the 4th largest trading partner of Egypt in 2007. Bilateral trade between India & Egypt amounts to US\$ 3.3 bn (2007-08). Indian investments in Egypt at present registers US\$ 700 mn and expected to reach US\$ 2 bn. While India's exports to Egypt have grown by 74.74% as compared to the previous year, the corresponding growth figure for engineering exports is 105.26%. Machinery, Instruments, Metals & Metal Products, Electrical Products, Automobiles & Components have been the major engineering products being exported at present to Egypt.

Ghana : Ghana remains one of the more economically sound countries in all of Africa. Ghana has a diverse and rich resource base, and as such, has one of the highest GDP per capita in Africa. Gold, timber, cocoa, diamond, bauxite, and manganese exports are major sources of foreign exchange. An oilfield which is reported to contain up to 3 billion barrels (480,000,000 m³) of light oil was discovered in 2007. Oil exploration is ongoing and, the amount of oil continues to increase. Ghana's industrial base is relatively advanced compared to many other African countries.

Ghana's industrial production is rising at a 7.8% rate, giving it the rank of 46th fastest growing industrial production nation in the world due to government's industrialization policies.

Trade and commercial relations between India & Ghana are governed by the Trade Agreement signed in 1981. Exim Bank of India has extended Lines of Credits to Ghana to help Indian exporters. India's major engineering exports to Ghana have been Iron & Steel Products, Machine Tools, Automobiles, Pumps, Agricultural Machinery, Electrical Items, Industrial Machinery, Stainless Steel Household Products. The statistics show tremendous increase in trade between India & Ghana for the last five years. The growth of Indian engineering exports to Ghana is 201% during 2007-08 (USD 503.65 mn) as against the exports during 2006-07 (USD 167 mn).
