About Russia

Russia ended 2006 with its 8th straight year of growth averaging 6.7% annually since the financial crises of 1998. Although high oil prices and a relatively cheap Rouble initially drove this growth, since 2003-04 consumer demand and, more recently, investment have played a significant role. A number of important reforms in the areas of tax, banking, labour and land codes have raised investor confidence which led to surge in FDI to 14.6 billion US\$ in 2005.

India and Russia :

Russia and India enjoy long standing historic relations. Immediately prior to the collapse of the Soviet Union, India was the largest trade partner. However, after its disintegration, total trade between India and Russia dropped drastically. Since 2001-02 there has been no growth in India's overall export to Russia. However, there has been a surge in import from Russia to India. Since 2003-04, India's trade balance with Russia is negative and on the rise.

In the engineering sector a growth is observed in export from India to Russia – 68% in 2005-06 over 2004-05. The major areas of growth are :

- Manufactures of Metals;
- Transport Equipments;
- Items of Iron and Steel.
- Machinery and Instruments;
- Machine Tools;

In view of the present economic boom in Russia, imports to Russia are increasing significantly. In order to increase India's share in Russia's global imports, it is being planned to organize an exclusive Indian Engineering Exhibition (INDEE) in St. Petersburg.
