**Chairman's Pen**

*My dear fellow exporters,*

*Apart from the progressive foreign trade policy measures that have been announced, some steps must be taken to soften the interest rate regime for the exporting community. While various kinds of windows are being opened up or expanded like those for investments in government securities and for ECBs, it is also important to lower the export credit in foreign currency so that our exporters have a level playing field. I refer, in particular, to the case of Export Credit in Foreign Currency, wherein the interest rate was earlier fixed at Libor plus 350 points. The RBI has now with effect from May 5th deregulated the interest rate as a result banks are charging at Libor plus 400 basis points, at the minimum. The international rates are much lower and even ECB is available in India at Libor plus 200 basis points. Accordingly, I feel that there should be an upper cap to interest rates on Export Credit in Foreign Currency and the rate should be reduced to Libor plus 200 basis points.*

Yours sincerely,

  
(AMAN CHADHA)
