India's Engineering Exports

Exports of engineering goods and services from India have reached to US\$ 19.8 billion in the year 2005-06 and registered a robust growth of 24.68%.

<i>Region</i>	<i>Engineering Exports in Million US\$</i>		
	<i>2003-04</i>	<i>2004-05</i>	<i>2005-06</i>
Europe	2398.29	3900.95	4307.95
USA & Canada	1411.40	2472.43	2892.19
ASEAN+2	1225.06	1911.00	2695.63
AFRICA	1158.66	1782.45	2294.01
LAC Region	210.13	461.57	572.12

Total	11552.79	15394.24	19183.32

The trend of growth in exports of engineering goods and services over the last three years indicates a steady growth of above 20%. In terms of regional groupings, the most important three markets - NAFTA, EU and ASEAN accounted for more than 47% of the Indian engineering exports. The most important individual market remains the United States, which accounts for more than 14% of the total exports of engineering products and services from India. The European Union in particular the UK, Germany, France, Belgium and Italy are the most important contributors to the engineering exports basket of India. It is notable that South Africa and Nigeria have emerged as top destinations in the African markets. Certain important countries of Indian exports that are primarily trading centres for further distribution include the UAE and Singapore.

Indian exports have shown a higher year - to - year increase in terms of global market share of engineering exports, however, this remains a low at about 0.47%. In order to foster the engineering exports growth, the Council continues its endeavour to double exports of engineering items from India in next 5 years and to take India's share in the world engineering close to 1%.
