

Chairman's Pen

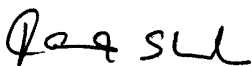

My dear fellow exporters,

With the financial year nearing completion, I am happy to inform you that your Council has successfully completed almost all the promotional activities and I must thank you for your continuous support and active participation.

The Council has already chalked out a plan for promotional activities during 2006-07, and submitted to Ministry for approval. Among the various activities, two INDEEs have been planned in Russia and China. Both Russia and China have tremendous potential in engineering items and with India as an emerging giant in engineering sector, I am sure you will be benefited by participating in these exhibitions. Besides, an Engineering Meet has been planned in India where industrialists from ASEAN, Latin American, African, CIS and European countries will be invited to interact with Indian entrepreneurs. This will definitely pave the way for better understanding of Indian industrial scenario and improved business relations.

The Info Bulletin is being circulated to you by the Council on a weekly basis, both in print version and E-version, and I am sure that you are being benefited by the information contained in it. However, to make an assessment of the effectiveness of Info, a questionnaire is being issued with the present copy and I would request you to spend few minutes, go through the questionnaire and give your valued feedback.

Yours sincerely,

(RAKESH SHAH)
