

Chairman's Pen

My dear fellow exporters,

As you all know that India has been selected as the Partner Country for the Hannover Fair 2006 and your Council has been entrusted with a major responsibility of mobilizing and coordinating participation for this Fair.

Mr. Wolfgang Pech, Managing Director of Hannover Messe visited India recently and made a presentation for potential participants in Delhi, Mumbai, Chennai and Kolkata while citing all the details of the Fair.

There would be a separate India Pavilion of around 10,000 sq. mt. of space, among the largest ever taken by a partner country, thus providing a unique opportunity for the Indian companies to showcase their technology, expertise and products.

We are looking for participation from 300 companies including large, medium and small enterprises and I solicit whole hearted support from all of you to come forward and participate in this event to be benefited from the unique opening that it provides.

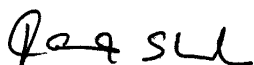

The Council has already started efforts in this direction and weekly circulars are being carried in INFO Bulletin. Besides this, members can also download Application Forms along with other participation details from the Council's website www.eepcindia.org I will keep you informed on the developments on this front.

Council's six member delegation of diesel engine manufacturers will be visiting Ghana, Togo, Senegal and Mali from 21st November to 3rd December.

India's business ties with all these countries are strong with increasing engineering exports from India. With increasing economic prosperity, these countries have opened new opportunities for the Indian Diesel Engine Manufacturers.

I extend my hearty greetings to all of you on the joyous occasion of Guru Nanak Jayanti. May the festival brings peace and harmony for everyone.

Yours sincerely,

(RAKESH SHAH)
