Trade enquiry received from Indian Missions Overseas

Egypt

(Source : Embassy of India, Damascus)

The Egyptian Polypropylene Bags Company (EPBC), a prominent firm in its field in Egypt, seeks consultancy of Indian firms specialized in Production Services in the field of manufacturing polypropylene woven sacks.

EPBC aim to produce sewn and laminated woven polypropylene bags for packing cement. The capacity of the plant is 100,000,000 bags per annum. The production lines comprise 4 extrusion lines, 103 looms, 3 laminating machines, 10 auto-cutting machines, 6 printers, 25 manual sewing machines, 4 compressing machines and a recycling line. All the machinery is of Chinese origin.

EPBC desired to change from producing only one type of bags which is cement bags to different types of bags used in packing fertilizers, chemicals, petrochemicals, rice, flour, and other agricultural products. This entailed changes in production patterns and flow of work which the workers were not accustomed to. As such the company is facing problems including delayed production and decreased quality.

They seek immediate help from a good Indian consultancy firm in reaching maximum efficiency in operations management.

Interested firms are requested to contact :

Mr. Vishnu Prakash
Minister
Embassy of India
Cairo, Egypt
Tel. : (202) 735 5794 (Office)
Fax : (202) 735 2765
