

**Council's Activities****Invites Participation in "The India Show" in Toronto, Canada
(17 - 20 October 2011)**

*Coincides with
CMTS 2011 - The Canadian Manufacturing Technology Show*

at

Direct Energy Centre, 100 Princes' Blvd, Toronto, ON M6K 3C3, Canada

While announcing the New Foreign Trade Policy for the period 2009-2014 on August 27, 2009, the Union Commerce & Industry Minister, Shri Anand Sharma had observed that "the Government seeks to promote Brand India through at least six 'Made in India' shows to be organized across the world every year". Accordingly, EEPC India will organize its 2nd "The India Show" in Toronto, Canada with support from Ministry of Commerce & Industry, Government of India. The main objective of "The India Show" is to promote India's Image and provide a platform to Indian Exporters to showcase their strengths and capabilities in an emerging market and developed country like Canada. The Show also enables us to get closer to fast-growing markets in North America. It will be our endeavor to highlight India as "Technology Hub" for Manufacturing Industry with equal participation from Small, Medium & Large industries.

"The India Show" is synchronized with the largest and most famous industrial exhibition CMTS 2011 (The Canadian Manufacturing Technology Show) organized by SME (Society of Manufacturing Engineers), Canada. India has been dedicated as "**Strategic International Partner**" in the exhibition. Around 150 Indian companies are participating at "The India Show" and there is large opportunity for partnership development, networking and exploring business linkages for your product. In 2009, there were 600 exhibitors from the manufacturing and distributing industries and a large number of professional visitors from manufacturing sector.

It is a specialized technology exhibition, covering product groups such as:

- Engineering Equipment and Components
- Industrial Machinery
- Machine Tools and Accessories
- Auto Parts
- Hand and Cutting Tools
- Aluminium Products and Supplies
- Intermediate Goods
- Mining and Building Equipment
- Renewable Energy Equipment

Why Canada

- Ernst & Young has identified Canada as one of the high-potential thrust markets for Indian engineering goods in the Strategy Paper for Growth of Engineering Exports.
- The Canadian Government has identified India as a key trade partner under its Global Commerce Strategy.
- The Canadian economy has grown at the rate of 10.9% over 2004–2008, with the absolute GDP at US\$1.5 trillion in 2008, making it one of the fast growing economies in the world. The economy of Canada is the ninth largest in nominal terms, and the fourteenth largest in PPP terms.

- Canada is one of the bright spots in the global economy. In 2009 Canada's GDP growth rate was 2.4 per cent, and according to the Country Commercial Guide 2010 of the US Government, the economy is predicted to grow 2.5 per cent and 3.2 per cent in 2010 and 2011, respectively.
- According to a 2009 Bank of Canada survey, Canadian businesses were experiencing a gradual increase in sales. Canada's strong and conservative banking and financial sector and increasing commodity prices have strengthened the Canadian dollar, reaching almost at par with the U.S. dollar. The strong Canadian dollar, growing Canadian economy and the increased demand for goods and services will make Canada a much sought after business partner in the years to come.
- Canada sourced 33% of its engineering imports from outside the NAFTA bloc in 2009, the value of which was about US\$44 billion.

Why choose Toronto

- Ontario's capital, Toronto, is Canada's commercial centre, home to half the country's largest financial institutions, 90 per cent of its international banks, and over 75 per cent of US subsidiaries in Canada. Ontario remains the economic engine of Canada due to its substantial and highly diverse industrial base.
- Of the world's largest cities, Toronto has the 7th largest economy, with a GDP of over US\$ 225 billion. It comprises 11% of Canada's GDP.
- Toronto's key industry clusters include automobile, aerospace, biomedical and biotechnology.
- Ontario is part of the North American manufacturing heartland.
- Ontario's highly diversified economy offers excellent opportunities in all sectors ranging from automotive, plastics, and aerospace to information and telecommunications technology and the life sciences.
