Chairman's Pen

My dear fellow exporters,

You are aware that Interest Subvention Scheme has been discontinued on March 31, 2011. It is extremely important for the continuation of Interest Subvention for 2011-12 given that the prime lending rates is now in the range of 13% to 14%. If the interest subvention goes, the MSME sector will be paying anything between 15%-18% for their Rupee Export Credit.

It may be mentioned that prior to the base rate system, all exporters used to get a 2% discount on Rupee Export Credit, which was further discounted for by an interest subvention of 2% for certain sectors. It was felt that since the Base rate was essentially a floor rate, there was no need for the general discount of 2% and hence this was discontinued with effect from June 30, 2010. Now that the Base Rate itself has gone up considerably, a general interest rate subvention of 2% for Rupee export credit is an indispensable pre-requisite.

I may also add that prior to the Benchmark Primary Lending Rate System, the RBI followed a policy of Refinancing of Export Credit to banks at the Repo Rate plus a certain margin. This system could be restarted with the RBI refinancing banks on export credit disbursed by them at Repo Rate plus 100 basis points.

The RBI has a policy wherein exporters can take foreign currency loan for export credit. This is known as Packing Credit in Foreign Currency (PCFC) where the interest rate charged is Libor plus 350 basis points. Unfortunately, banks are unable to provide PCFC as they claim that there is an acute shortage of Foreign Currency Credit. This seems rather strange given that India has a foreign exchange reserve of nearly USD 300 billion.

There is also the need to lower the cost of credit for working capital requirement given the RBI's tight money policy. With inflationary pressures unlikely to ebb in the near future, the high cost of credit will be an extremely important determinant of the external competitiveness of the Indian engineering sector.

We also need low cost credit for investment in capital goods and equipments. If possible we need credit in foreign currency at libor plus 2% so that the MSME sector can move up the value chain through capital goods investment.

Many of the tiny units do not have access to credit because of inadequate collaterals. There are schemes in place for the MSME sector formulated by RBI providing collateral free lending up to Rs 1 crore. But these schemes are not implemented at the grassroots/branch level of banks. We need to look at other measures of funding which does not stress on collaterals.

I do hope that the Government will extend the Interest Subvention Scheme for one more year with effect from April 1, 2011.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Aman Chadha'. The signature is fluid and cursive.

Council's Activities

EEPC India Invites Participation for India Pavilion at Saudi Elenex 2011 Riyadh, Saudi Arabia (29 May-1 June, 2011)

Saudi Arabia is India's 10th largest export destination and the 2nd largest among the GCC (Gulf Cooperation Council) countries after UAE. Bilateral trade between India and Saudi Arabia has increased by over 6 times in the last 5 years from 3.4 billion USD in Yr. 2005-06 to 21 billion USD in Yr. 2009-10. Recently Saudi Arabia has made consistent efforts to diversify its economy and power generation has been identified as one of the major sectors for diversification. Saudi Arabia holds immense potential for the Indian trading community particularly in light of the India's Framework agreement with GCC countries.

Saudi Arabia's electricity sector is expanding by 7% a year. Over the coming 20 years, projects worth almost USD 120 billion are going to be undertaken to satisfy demand for electricity generation, distribution and transmission - creating demand, as well, for subsidiary electricity-related products and equipment. Saudi Government spends billions of dollars on constructing and upgrading power plants, and will have to rely strongly on foreign investors and suppliers to satisfy the surge in demand for electricity-related equipment and machinery. An array of investment opportunities in Saudi Arabia exists for electricity industry players from across the region and the world.

Saudi Elenex is the International Electrical Engineering, Power Generation and Distribution Exhibition in Saudi Arabia. **Saudi Elenex 2011** taps into rising demand for electrical products, amid powerful construction sector growth. Since the year 2000, Saudi Arabia's power generation equipment market has been growing by around 5% annually, and the oil, gas and petrochemicals sectors are likely to drive electricity demand for a long time to come. Organizers expect another successful year, with key decision makers attending Saudi Elenex on the lookout for lucrative investment deals in this growing market. Saudi Elenex, Saudi Aircon and Saudi Luminex exhibitions will be held concurrently to ensure the large number of visitors.

EEPC INDIA is organizing an India Pavilion in **Saudi Elenex 2011**. Participating in the above exhibition will enable Indian companies to further widen their reach in the highly lucrative Middle East market and also would provide an excellent opportunity for establishing business relationships with customers from all over the world.

EEPC India Invites Participation for India Pavilion at Newcast 2011, Düsseldorf, Germany (28 June - 2 July, 2011)

The third NEWCAST exhibition will be taking place in Düsseldorf, Germany during 28th June – 2nd July 2011. This is the world's leading international trade fair for precision castings offering encouraging conditions for attracting new business.

EEPC INDIA is organizing an India Pavilion at this show. As an exhibitor, at this event you get the opportunity to meet the top decision-makers of the casting industry from all over the world, who are on the look-out for innovative "casting solutions" and sustainable "casting concepts". More than half of the trade fair visitors and users came to the NEWCAST in 2007 with firm intentions to invest in new business and technology. The NEWCAST has emerged as the most important platform to present highly innovative sustainable solutions in cast iron for all industrial growth markets. It offers high-caliber "business to business" encounters with International purchasers, users and industry leaders in attendance.

Focus Sector

The spectrum of focus ranges from vehicle manufacturing and the aerospace industry to machinery and plant technology and even as far as medical technology. For the sustainable, environmentally-friendly, low-CO₂ energy production of the future, casting products play a central role on the basis of innovative materials.
