Chairman's Pen

My dear fellow exporters,

EEPC India has been taking up with the Government a large number of issues, some of which have been accepted by the Government. Some of these issues are the expansion of engineering tariff line in the Focus Product Scheme and Market Linked Focus Product Scheme; simplification of procedures with respect to CENVAT credit and TED Refund; clarification that no Service Tax need to be paid for participation in exhibition abroad; no retrospective application of Service Tax on membership fees of Council for the period 2005 to 2008; re-clarification that input credit will be allowed for Service Tax paid under reverse charge of section 66A . This will solve our member problems of the Excise Department issuing Show Cause Notice on Input Credit of Service Tax on Foreign Agent's Commission.

Further, a number of transaction costs reducing steps have been initiated in the Report of the Task Force on Transaction Cost released in February 2011 by the Union Finance Minister. The Strategy Paper for doubling exports in the next three years i.e. by 2011-12 to 2013-2014 released by the Union Commerce & Industry Minister in February 2011 has recognized the need for Technology Upgradation Fund Scheme; the need to provide credit at low cost for investment in Capital Goods and Equipment; the need for Skill Development Fund for engineering industry as also the need to align Market Linked Focus Product Scheme and FPS to big, niche and tough markets.

I must, however, reiterate that there are still a number of challenges that the engineering exporting community and the Council will have to face in the future. To begin with, the Union Budget Proposals for the current year has been a dampener and shows remarkable disconnect with respect to the concern shown in the Strategy Paper for doubling of exports that even if exports doubled to USD 450 billion by 2013-14, the BOT deficit in 2013-14 will be over 9% of GDP. We do therefore hope that when the Finance Bill is passed in Parliament or may be in the amendments to the Foreign Trade Policy, some additional measures would be taken by the Government to sustain the buoyancy that has been generated in 2010-11.

This month's focus is on various aspect of India's economy. We do hope you will find this edition interesting and I welcome your comments and suggestions in improving the contents of the magazine.

Yours sincerely,

Council's Activities

EEPC India Invites Participation for India Pavilion at Automechanika Middle East 2011 (7 - 9 June 2011, Dubai, UAE)

Automechanika Middle East is the event for the rapidly developing automotive aftermarket in the wider Middle East and Africa. The event covers the full range of parts for motor vehicles, as well as components for the drive, chassis, body, electrics and electronic groups, equipment for vehicle service and repair, bodywork repair and painting, tyres, batteries and performance systems. Automechanika Middle East continues to confirm the participation of market leaders from the automotive sport, workshop equipment, tyres & batteries, parts & systems, repair & maintenance and accessories & tuning Industries worldwide.

Dubai is a strategic location between Europe and the Far East with excellent trade connections. From here, the lucrative Middle East, Sub-Continental and African markets can be easily reached with their combined population of more than 1 billion people. Considering import/re-export ratio, Dubai is the third most important re-export centre in the world after Hong Kong and Singapore. The Spare Parts market in the Gulf States is valued at over US\$12.6 billion per year. Auto parts are consistently listed as one of the top ten re-exported commodities from Dubai.

The Gulf Countries have been trade partners of India for centuries. The discovery of Oil opened a new era of Industrialization of this region. The GULF markets are growing markets for Indian engineering goods. Export of engineering items to this region during the 2008-09 stood at US\$ 6.16 billion compared with US\$ 5.73 billion during previous financial year, registering an overall growth of 7.5 per cent.

EEPC INDIA is organizing an India Pavilion at Automechanika Middle East 2011, Dubai, UAE which would provide an excellent opportunity for establishing business relationships with customers from all over the world.

Focus Products

Parts & Systems

Powertrain (engine, gearbox, exhaust), chassis (axles, steering, brakes, wheels, dampers), bodywork (sheet metal parts, mounted parts, windows, bumpers), roof systems (folding roofs, convertible roofs, panoramic roofs), interior (cockpits, instruments, airbags, trims, seats, heating, airconditioning, electrical adjusters), infotainment (radios, aerials, navigation systems, telematics, mobile phones), electrics/electronics/sensor systems (electrical system, battery, headlights, cables, wiring harnesses, control modules, bus systems, driver assistance systems), standard parts (fastening elements, thread and securing elements, sealing rings, filters, roller bearings), regenerated parts (reconditioned, overhauled parts).

Accessories & Tuning

Accessories and special equipment for motor vehicles in general, tuning, performance systems (motorsport), design enhancement, optical tuning, car trailers and small commercial vehicle trailers, parts for trailers, tyres and wheel rims.

EEPC India Invites Participation for India Pavilion at Newcast 2011, Düsseldorf, Germany (28 June - 2 July, 2011)

The third NEWCAST exhibition will be taking place in Düsseldorf, Germany during 28th June – 2nd July 2011. This is the world's leading international trade fair for precision castings offering encouraging conditions for attracting new business.

EEPC INDIA is organizing an India Pavilion at this show. As an exhibitor, at this event you get the opportunity to meet the top decision-makers of the casting industry from all over the world, who are on the look-out for innovative "casting solutions" and sustainable "casting concepts". More than half of the trade fair visitors and users came to the NEWCAST in 2007 with firm intentions to invest in new business and technology. The NEWCAST has emerged as the most important platform to present highly innovative sustainable solutions in cast iron for all industrial growth markets. It offers high-caliber "business to business" encounters with International purchasers, users and industry leaders in attendance.

Focus Sector

The spectrum of focus ranges from vehicle manufacturing and the aerospace industry to machinery and plant technology and even as far as medical technology. For the sustainable, environmentally-friendly, low-CO₂ energy production of the future, casting products play a central role on the basis of innovative materials.
