

Low base, green shoots in Europe helps Indian exports: EEPIC India

The smart uptick in merchandise exports in October this year is certainly a welcome feature for the Indian trade; but the performance has also come about in the context of low base of export growth in the previous fiscal, said Chairman of the EEPIC India Mr T S Bhasin. He said , there are signs of improvement in some select European countries and the trade has also been helped by shipments to some of the neighbouring countries like Nepal.
