

EEPC India Invites Participation for India Pavilion at AUTOMECEC 2011, Sao Paulo, Brazil (12 - 16 April, 2011)

AUTOMECEC - International Trade Fair for Auto Parts, Equipments and Services is the meeting point of the replacement industry, and a leader event in Latin America. At a single place, the market of automotive replacement presents at AUTOMECEC innovations and solutions for the segment of parts, accessories and tuning, rebuilding and maintenance, IT and management.

AUTOMECEC is the ideal platform to promote products and services to an important business generating pole; a great opportunity to present market trends; an excellent strategy to propel sales; to strengthen the image of trademarks, quality and services; to analyze your competitors and conquer new client; and to reinforce the relationship with qualified buyers and visitors from Brazil and abroad.

EEPC INDIA is organizing an **India Pavilion at AUTOMECEC 2011** which would provide an excellent opportunity for establishing business relationships with customers from all over the world, particularly Latin American countries. It is expected that 900 exhibitors will participate in the 2011 edition of AUTOMECEC and 70,000 visitors from all over the world will converge in the show.

Automotive market in Brazil

Today, the Brazilian auto industry is a major driver of economic growth. The automotive industry makes a major contribution to the Brazilian economy, contributing 23.5% of industrial GDP and providing employment for more than 1.5 million workers. Strong domestic demand has largely insulated the sector against the downturn in global markets.

Brazil is becoming an emerging market leader for technology development because of its highly skilled and qualified engineers and relatively low labour costs compared to developed countries. Brazil has the largest number of car assembly plants in the world, manufacturing more than 30 brands.

There has also been a recent up-turn in automotive investments. Volkswagen has announced plans to spend \$3.5 billion on up-grading their Brazilian plants and local product development capabilities by 2014, whilst Toyota have confirmed that they will build a second assembly plant at Sorocaba. Meanwhile, General Motor's \$ 800 million "Project Viva" – financed from local profits and loans - foresees the local production of 9 new models by 2012. South Korean and Chinese manufacturers are also reportedly planning investments in new production facilities.

The Brazil auto parts industry is an unrecognized source of automotive components and whole cars. It will come to the surprise of many people that this South American country is the world's 8th largest supplier in the automotive industry. They have many state-of-the-art research and development laboratories where they engineer and design original, performance and aftermarket parts. In fact, the entire car can be engineered and built with auto parts from Brazil. Brazil exports many motor vehicles to the US, Germany, the UK, Argentina, Mexico and a growing number of other countries around the world. Brazil now faces the challenges of keeping pace with the expansion of the domestic vehicle market, and playing a more prominent role in global supply chains.

India currently ranks 26th among auto exporting countries, earning \$ 5.5 bn a year with less than 1 per cent of the world auto exports market. India's export of auto components to Brazil has increased from US\$ 53.96 Million in 2008 to US\$ 66.18 Million in 2009 with a share less than one per cent of total auto components import by Brazil.

Focus Products

Spare Parts and Systems: Engine, vent, axle, steering, breaks, wheels, bolsters, metallic parts, assembled parts, windows, bumpers, bending roof, convertible roods, panoramic covering, instruments, airbags, caps, seats, heating, air conditioning, electrical adjusters, internal filters, radio, antennas, navigation, telematica, telemobile, DVD, electrical, battery, lights, cables, whips, control units, bus systems, driver assistance systems, fixation elements, bearing fixation rings, rollers, replacement parts, repairs, restoration, hybrid, and gas.
