

## EEPC Invites Participation at Multi-Product Engineering Delegation to Algeria and Morocco (18 - 23 November, 2007)

The Council is pleased to announce the fielding of a Multi-Product Engineering Delegation to Algeria and Morocco during 18th to 23rd November, 2007.

### Algeria

Algeria is running substantial trade surpluses and building up record foreign exchange reserves. Real GDP has risen due to higher oil output and increased Government spending.

India's Engineering Export to Algeria is increasing in a decent proportion during last 3 years. Our exports during 2005-06 was US\$174.16 million against US\$151.63, showing an increase of 14.86% over the performance during 2004-05, whereas our exports during 2006-07 was US\$246.96 million registering a growth of 41.80% over the performance during 2005-06. Although India's engineering exports to Algeria have shown a continuous growth during last 3 years, its share in the overall imports of engineering goods into Algeria remains 1.5% approximately. It shows that there is much more potential for increasing export of engineering goods from India to Algeria.

### Morocco

Morocco is a fairly stable economy with continuous growth over the past half-a-century. It is considered liberal economy governed by the laws of supply and demand. The economic system of the country presents several facets. It is characterized by a large opening towards the outside.

Bilateral trade between India and Morocco was to the tune of US\$583.88 million during 2005-06 showing an increase of 23.02% over previous year and the figures for 2006-07(April-December) touched US\$500.00 million. As far as India's engineering export to Morocco is concerned, it is showing an increase of 36.47% during 2005-06 over the performance in previous year and 23.00 % increase during 2006-07 over the performance during 2005-06. In spite of continuous growth in India's engineering export to Morocco, our share remains less than one percent i.e. 0.63% of total engineering imports into Morocco. Hence, there is good scope for enhancing India's engineering export to Morocco.
