

I am delighted to learn that Engineering Export Promotion Council of India (EEPC) is organising the 52nd and 53rd National Export Awards on 21 November, 2023 in New Delhi to felicitate the best export performers.

The Engineering Sector is responsible for 25% of India's exports, making it the largest foreign exchange earner for the country. 35 to 40 percent of the exports come from the MSME sector. EEPC India has played a significant role in branding Indian Engineering on the global scale. It has put commendable efforts for promoting the exports of engineering goods and services from India.

Under the leadership of Hon'ble Prime Minister Shri Narendra Modi Ji, engineering sector has achieved the reputation of being fastest growing sector. I am sure EEPC will continue to play a vital role in our engineering goods export growth in the coming years.

I congratulate all the award winners for their determined efforts in promoting India's engineering exports and wish EEPC India all the success in its future endeavours.
