About EEPC India

EEEPC India has been the face of India's engineering exports over a span of 63 years when India grew from a meagre \$10 million engineering export nation in 1955 to US\$76.2 billion in 2017-18. It has been recognised as a model export promotion council by the Union Ministry of Commerce and Industry.

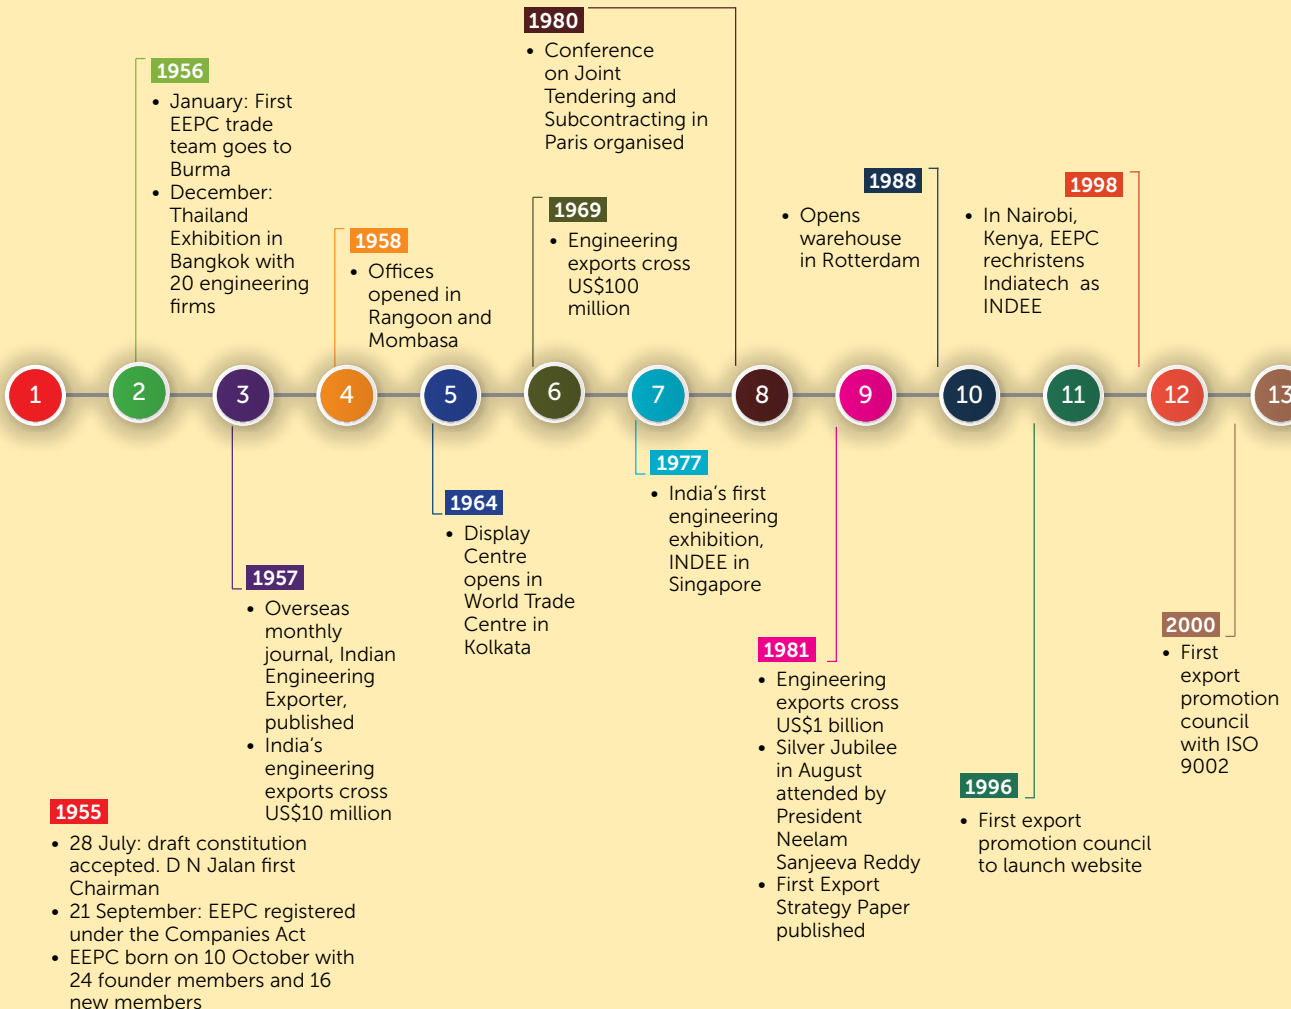

EEPC India is the premier trade and investment promotion organisation in India. It is sponsored by the Ministry of Commerce & Industry, Government of India and caters to the Indian engineering sector. It has many firsts to its credit – the first Indian export promotion council to have a website, to be ISO certified, to have a mobile app, to have an in-house Technology Centre and also to e-catalogue product profiles.

As an advisory body, it actively contributes to the policies of the Government of India and acts a prime conduit between the Indian engineering fraternity and the Government of India.

Set up in 1955, EEPC India now has a membership base of over 13,000, with over 60 percent from the MSME segment. EEPC India has been a catalyst of Indian engineering exports by participating and organising year-long promotional activities, including buyer-seller meets (BSM), both in India and abroad, managing India Pavilions and information booths in select overseas exhibitions to demonstrate the capabilities of the Indian engineering industry.

EEPC India also organises its own overseas exhibition – INDEE (Indian Engineering Exhibition) and its domestic counterpart – IESS (International Engineering Sourcing Show). INDEE, since its inception in Singapore, has completed 41 years this year, covering 27 countries across six continents. IESS is the largest engineering rendition on Indian soil and the only Indian engineering sourcing show that showcases the latest technologies and is a preferred meeting place for global buyers and sellers. This show also encourages foreign investments in line with the newly-initiated 'Make in India'.

EEPC India also publishes several reports and studies, catalogues, newsletters and magazines to keep members abreast of policies and also as a means to market Indian engineering globally. Keeping 'Engineering the Future' as its motto, EEPC India continues its tireless efforts to convert India into a global engineering hub!

INDIA'S 63-YEAR JOURNEY

2001

- ISO 9001 certification in Caracas, Venezuela for designing and organising exclusive engineering exhibitions abroad

2006

- Engineering exports cross US\$20 billion
- Indian Pavilion at Hannover Messe 2006 attended by Prime Minister Manmohan Singh
- EEPC membership crosses 12,000
- Monthly colour magazine, Indian Engineering Exports, launched

2011

- First India Show in Istanbul, Turkey

2008

- New logo and new identity as an investment and trade promotion body. From now on, known as EEPC India

2015

- India was Partner Country and EEPC lead agency at Hannover Messe 2015
- India's engineering exports reach US\$70.6 billion
- Diamond Jubilee attended by the President of India, Shri Pranab Mukherjee, September

2017

- INDEE for the first time in Bangladesh
- India Partner Country at MSV 2017, Brno, the Czech Republic
- E-catalogues launched

14

15

16

17

18

19

20

21

22

23

24

2005

- Launches new website
- Indiatech exhibition in Mexico City is renamed INDEE

2007

- 50th year celebrations attended by President Dr A P J Abdul Kalam

2014

- Engineering exports reach US\$62.2 billion
- Country Desk set up and monthly newsletter on world regions begins web publication

2012

- First India Engineering Sourcing Show (IESS)

2016

- EEPC INDIA was the official organiser of the India Pavilion at the 7th edition of the largest Industrial Trade Fair in Russia -INNOPROM 2016
- EEPC India executed a record 30 international events across 20 countries
- Did a record of four INDEEs in one calendar year in Cambodia, Sri Lanka, Kenya and Peru
- EEPC India is regarded as a Model EPC by the Union Ministry of Commerce and Industry

2018

- INDEE for the third time in Thailand
- Seventh IEISS with Czech Republic as the Partner Country

Foreword

INCREASING industrialisation and economic development drives growth in the capital goods market. The turnover of the capital goods industry is estimated to have reached US\$70.00 billion by 2017 and the forecast is US\$ 115.17 billion by 2025.

Infrastructure investments in India went up from US\$369.28 million in 2008-12 to US\$577.19 million in 2013-17 and are further expected to grow to US\$778.90 million. The Indian Government has also renewed its focus on infrastructure. With the development of infrastructure, demand for machinery is expected to rise significantly. FDI inflows into the miscellaneous mechanical and engineering sector stood at US\$3.45 billion in April 2000-June 2018.

Growth in the power industry is expected to drive growth in the electrical equipment industry. Electrical equipment market production is forecasted to reach Rs500,000 crore (US\$100 billion) by 2022 from Rs175,000 crore (US\$27.3 billion) in 2017-18. BHEL, ABB and CG are the major players in this segment in India. The sector contributes about 8% to manufacturing in terms of value, and 1.5% to the overall GDP.

During FY07-18, India's energy requirement grew at a CAGR of 5.24 per cent, with the energy requirement reaching to 1,212.13 BU (Billion Unit) in FY18. Energy requirement during Apr-Oct 2018 stood at 769.40 BU. India's share of global energy demand is expected to rise to 9 per cent by 2035. Higher demand for energy has led to increasing capacity additions for power generation that, in turn, boosted demand for power generation and transmission equipment. Power Transmission and Distribution (T&D) expenditure is

set to increase on growth in power generation and privatisation of distribution. In FY18, 23,119 ckm (circuit kilometre) of transmission lines have been commissioned. This is 100.14 per cent of the annual target of 23,086 km fixed for 2017-18.

Major electrical equipment manufactured include Electric power equipment and parts, Electric wires and Cables, Boilers and Parts and Transmission line towers and parts. India imported electric machinery and equipment worth US\$8.31 billion during FY18. Imports during Apr-Oct 2018 stood at US\$6.04 billion. India's electrical equipment industry had a record seven-year high growth of 12.8 per cent in 2017-18, mainly because of government spending on rural and household electrification schemes and programmes.

EEPC India, under the aegis of Ministry of Commerce and Industry, Government of India, has identified the Electrical Machineries, Equipment and Components sector as one of the four focus sectors under 'Brand India Engineering.' 'Brand India Engineering' is an initiative being implemented by EEPC India under the aegis of the Ministry in close cooperation with the industry to increase Indian engineering exports, by highlighting and showcasing Indian products and their capabilities in the global market. The initiative involves a 360-degree approach in promoting the branding of Indian engineering products.

The Electrical Equipment product catalogue would serve as an overview on the sector and help you with our member contacts representing this segment.

Ravi Sehgal
Chairman, EEPC India

INDIAN ELECTRICAL MACHINERY AND EQUIPMENT INDUSTRY

AN efficient power supply system is a key requirement for a nation's economic growth and the quality life of its citizens. Assured availability of quality power at a reasonable cost will not only act as a catalyst in the socio-economic development of the country, but also enhance the global competitiveness

of the industrial sector. It will also lead to enhanced employment generation and per capita income levels.

By 2022, the installed power capacity in India is expected to reach 350 gigawatts (GW) from 243 GW in 2014, on the back of increasing industrialisation and economic development. Thus a rapid development

of a robust and healthy domestic electrical machinery and equipment industry, supporting the complete value chain in power generation, transmission and distribution, is not only crucial for the economy, but is also of strategic importance for India.

With a production of 1423 TWh, India is the third largest producer and the third largest consumer of electricity in the world. India has moved up to the 26th spot in the global electricity accessibility rankings of the World Bank's Ease of Doing Business Index 2018. The government's rural electrification program and some of the administrative measures taken for better accessibility have contributed to the improvement.

The electrical machinery industry in India is poised for a turnaround with the Government of India de-licensing the industry and allowing 100 percent foreign direct investment (FDI) to facilitating the entry of global majors, promoting the adoption of advanced technologies and R&D by companies, taking initiatives to increase power generation capacity, lowering tariffs and duties on power generation and transmission and distribution equipment, providing support to the industry to expand export markets, and taking steps to improve infrastructure, among other measures.

The electrical machinery sector broadly comprises of generation equipment (boilers, turbines, generators) and transmission & distribution (T&D) and allied equipment like transformers, cables, transmission lines, switchgears, capacitors, energy meters, instrument transformers, etc. The T&D equipment sector, dominates the sector making up for 85% of the industry whereas generation equipment sector accounts for the rest 15%. The industry registered a double-digit growth rate of 12.8% over 2017-18 as compared to 2016-17.

Installed capacity for different sources of power - FY 18 (GW)

Growing Demand

Attractive opportunities

Policy Support

Higher investments

Growing population along with increasing electrification and per-capita usage to drive growth in power consumption to 1,894.7 TWh in 2022.

Increasing growth avenues in renewable power segment, driven by the target to achieve renewable installed capacity of 175 GW by 2022.

Electrification in the country is increasing with the support of schemes like Deen Dayal Upadhyay Gram Jyoti Yojana (DDUG-JY) and Integrated Power Development Scheme (IPDS).

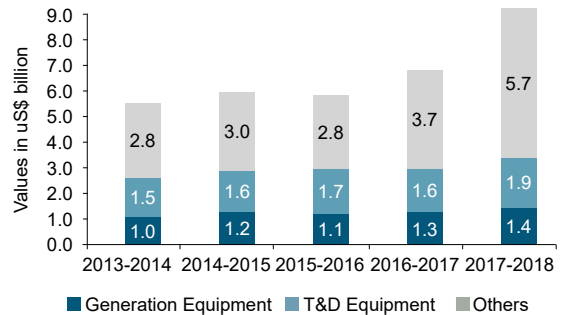

India's power sector is forecasted to attract investments worth Rs 11.56 trillion (US\$ 179.31 billion) between 2017-2022 in thermal, hydro, nuclear and renewable segment.

Some interesting facts about the electrical machinery sector

- In 2017-18, the total production of Electrical Equipment Industry stood at USD 27.3 billion.
- The sector contributes about 8% to manufacturing sector in terms of value, and 1.5% to the overall GDP
- By 2022, domestic demand for generation equipment and transmission & distribution sector is expected to be in the range of USD 25-30 billion and USD 70-75 billion respectively
- Market-oriented reforms, such as the target of 'Power for All' plans to add 93 GW during 2017-2022, will further generate huge demand for power transmission & distribution equipment
- A large pool of human resources and adequate workforce available, also the sector is projected to provide direct employment to 1.5 million people and indirect employment to 2 million people by 2022
- Government also plans to establish Electrical Equipment industry clusters, along with building strong support infrastructure
- The industry registered a double-digit growth rate of 12.8% over 2017-18 as compared to 2016-17.
- The subsector of heavy industry provides direct employment to 0.5 million persons, indirect to 1 million, and over 5 million across the entire value chain. Additionally, India has state of the art technology that is at par with the global standards
- Major export markets for the sector are USA, UAE, Germany and UK. India is a major exporter of Switchgear and Control gear, Transformers & Parts, Industrial Electronics, Cables, Transmission Line Towers, Conductors, Rotating Machines (Motors, AC Generators, and Generating Sets) & Parts, within the sector
- Major export markets for the sector are USA, UAE, Germany and UK. India is a major exporter of Switchgear and Control gear, Transformers & Parts, Industrial Electronics, Cables, Transmission Line Towers, Conductors, Rotating Machines (Motors, AC Generators, and Generating Sets) & Parts, within the sector
- Within the sector, high output growth sub sectors are Power Generation Systems and Cables, having industry size worth USD 6.92 billion and USD 6.34 billion
- The demand for inter-regional transmission system (transmission lines and associated substations) is projected to have a peak demand of 226 GW in the 2021-22-time frame
- Making electricity accessible has been the key concern, and with various initiatives taken, India has managed to scale itself up to 26th position in terms of electricity accessibility, from 99th in 2014. Alongside, transmission lines witnessed a 26 % increase from 2, 91,336 circuit kilometres (ckm) in March 14 to 3, 66,634 ckm in March 17
- Steps taken for Skill Development, such as setting up of EESDC (Electrical Equipment Skill Development Council), would help bridging the skill gap required for critical manufacturing, with a clear objective of enhancing exports. The Government has approved 15 SEZ's for the engineering sector, and electrical machinery is a part of the sector. Further, development of Delhi –Mumbai Industrial sector is expected to provide a big boost to the Engineering and hence electrical equipment sector.

ELECTRICAL MACHINERY EXPORTS ON THE RISE

Exports of Electrical Machinery and Equipments rose to USD8.9 billion in 2017-18 from USD5.3 billion in 2013-14 with a CAGR of 13.7%.

Strategies adopted

- New technologies – High-voltage technology is being developed in the Electrical Equipment industry, for economical power transmission. Firms are diversifying into the nuclear reactor business, as the government wants to increase its nuclear power base
- Capacity addition – India plans to increase investment in infrastructure (including electricity), as it lags behind other countries. With more capacity addition in the power sector, demand for electrical machinery would rise, prompting the companies to increase their production capacity
- Promotion of R&D – The Government is helping companies enhance the level of research to match the best in the world. The Government has relieved customs duties on some equipment. Companies, too, are enhancing their R&D departments to take advantage of the situation
- Skill upgradation and incentives – Skill upgradation is necessary as firms need to have the desired talent pool. The Government plans to set up the Electrical Equipment Skill Development Council (EESDC), which would focus on identifying critical manufacturing skills required for the electrical machinery industry. It is enhancing export incentives by removing export barriers

Favourable policies

- De-licensing – The Electrical Machinery industry has been de-licensed; 100% FDI is allowed in the sector. This has facilitated the entry of global majors into the electrical machinery industry in India
- Tariffs and customs duties – The Government has removed tariff protection on capital goods. It has also lowered customs duties on a range of equipments. Relatively lower customs duties; 5.0% for power generation equipment and 7.5% for T&D
- Initiatives to increase power generation – Planned capacity addition of 115 GW in the 12th Five-Year-Plan. The government is targeting to provide 24/7 power by 2022. Through the Accelerated Power Development Reform Programme, the government plans to provide reliable, affordable and high-quality power to all
- FDI policy – 100% FDI has been allowed under the automatic route in the Electrical Machinery sector
- SEZ – The Government has approved 15 SEZs for the engineering sector across the country; electrical machinery is a part of the sector. As of 10 May 2016, 13 exporting SEZs are operational. The Delhi-Mumbai Industrial Corridor being developed across seven states could boost the engineering sector

Vision 2022 for India's electrical equipment industry

- Vision statement – To make India the country of choice for the production of electrical equipment and reach an output of USD100 billion by balancing exports and imports
- Focus on industry competitiveness – To focus on

technology and R&D and bring it on a par with the global benchmark, the Government has lowered customs duties on a range of equipment

- Identify skills to support industry's requirement – The Government plans to set up the Electrical Equipment Skill Development Council (EESDC) which would focus on identifying critical manufacturing skills required for the Electrical Machinery industry
- Develop and strengthen support infrastructure – The Government plans to establish Electrical Equipment industry clusters. It plans to take steps to enhance product-testing infrastructure in the country
- Increase share in export market – The Government plans to provide credit support to economically less-developed export markets. It aims to create a dedicated fund for EXIM bank to support exporters in the electrical machinery industry

EEPC India, under the aegis of the Ministry of Commerce and Industry, Government of India, has identified the Electrical Machinery, Equipment and Components sector as one of the four focus sectors under 'Brand India Engineering.'

'Brand India Engineering' is an initiative being implemented by EEPC India under the aegis of the Ministry of Commerce and Industry, Government of India, in close cooperation with the industry to enhance Indian engineering exports, by highlighting and showcasing Made in India products and their capabilities in the global market. The initiative involves a 360-degree approach in promoting the branding of Indian engineering products.

High-voltage technology is being developed in the Electrical Equipment industry for economical power transmission. Firms are diversifying into the nuclear reactor business because the government wants to increase its nuclear power base.

FINANCIAL SUPPORT

MANUFACTURING COMPANIES WITH IN-HOUSE R&D CENTRES

A weighted tax deduction of 200% under Section 35 (2AB) of the Income Tax Act for both capital and revenue expenditure incurred on scientific research and development. (Expenditure on land and buildings are not eligible for deduction).

State incentives

Apart from the above, each state in India offers additional incentives for industrial projects. Incentives are in areas like subsidised land cost, relaxation in stamp duty, exemption on the sale/lease of land, power tariff incentives, a concessional rate of interest on loans, investment subsidies/tax incentives, backward areas subsidies, special incentive packages for mega projects, etc.

Export incentives

- Export promotion capital goods scheme.

- Duty remission scheme.
- Focus product scheme, special focus product scheme, focus market scheme.

Skill development

Steps taken for Skill Development, such as setting up of EESDC (Electrical Equipment Skill Development Council), would help bridging the skill gap required for critical manufacturing, with a clear objective of enhancing exports.

Area-based incentives

The Government has approved 15 SEZ's for the engineering sector, and electrical machinery is a part of the sector. Further, development of Delhi –Mumbai Industrial sector is expected to provide a big boost to the Engineering and hence electrical equipment sector.
